

If you want to keep this prosperity going, vote for the Democrats. That's the message that you've got to get out there all over America.

But if you look at all the other areas where we're different—we're for a real Patients' Bill of Rights, and they're not. We're for a Medicare prescription drug program that every senior who needs it can buy into on a voluntary basis, and they only want to help half the people who need the medicine. Their plan won't work. It has already been tried in one State, and they keep on doing it. It's wrong. We are the party that wants to help provide the medicine that our seniors need and deserve, and every American needs to understand that. Every American needs to understand that we are the party for smaller class sizes and modern schools and after-school and summer school and preschool programs for the kids who need it and a tax deduction to pay for the cost of college tuition so that everybody's child can have 4 years of college. That's the Democratic Party, and people need to know that, and I want you to help them know that.

And for all of you there, the most important thing I want you to do is make sure Julia Carson wins an overwhelming reelection. She's a wonderful woman and a great Representative in Congress.

Thank you, and God bless you all.

NOTE: The President spoke at 4:25 p.m. from the Residence at the White House to the rally at the Indianapolis Colts Complex in Indianapolis, IN. In his remarks, he referred to Joseph J. Andrew, national chair, Democratic National Committee; Gov. Frank O'Bannon, Lt. Gov. Joseph E. Kernan, and State Attorney General Karen Freeman-Wilson of Indiana; and Senator Bayh's wife, Susan. Representative Carson is a candidate for reelection in Indiana's 10th Congressional District.

### **Statement on Returning Without Approval the "Energy and Water Development Appropriations Act, 2001"**

*October 7, 2000*

Today I vetoed a deeply flawed energy/water appropriations bill that threatens major environmental harm by blocking our efforts

to modernize operations on the Missouri River. This antienvironmental rider would not only jeopardize the survival of three threatened and endangered species but would also establish a dangerous precedent aimed at barring a Federal agency from obeying one of our Nation's landmark environmental statutes.

Additionally, this bill funded scores of special projects for special interests. It failed to provide sufficient funding for priorities in the national interest—including environmental restoration of the Florida Everglades and the California-Bay Delta, and our strategy to restore endangered salmon in the Pacific Northwest. It also failed to fund efforts to research and develop nonpolluting sources of energy through solar and renewable technologies that are vital to America's energy security.

I urge Congress to quickly produce an energy/water bill I can sign.

### **Message to the House of Representatives Returning Without Approval the "Energy and Water Development Appropriations Act, 2001"**

*October 7, 2000*

*To the House of Representatives:*

I am returning herewith without my approval, H.R. 4733, the "Energy and Water Development Appropriations Act, 2001." The bill contains an unacceptable rider regarding the Army Corps of Engineers' master operating manual for the Missouri River. In addition, it fails to provide funding for the California-Bay Delta initiative and includes nearly \$700 million for over 300 unrequested projects.

Section 103 would prevent the Army Corps of Engineers from revising the operating manual for the Missouri River that is 40 years old and needs to be updated based on the most recent scientific information. In its current form, the manual simply does not provide an appropriate balance among the competing interests, both commercial and recreational, of the many people who seek to use this great American river. The bill would also undermine implementation of the

Endangered Species Act by preventing the Corps of Engineers from funding reasonable and much-needed changes to the operating manual for the Missouri River. The Corps and the U.S. Fish and Wildlife Service are entering a critical phase in their Section 7 consultation on the effects of reservoir project operations. This provision could prevent the Corps from carrying out a necessary element of any reasonable and prudent alternative to avoid jeopardizing the continued existence of the endangered least tern and pallid sturgeon, and the threatened piping plover.

In addition to the objectionable restriction placed upon the Corps of Engineers, the bill fails to provide funding for the California-Bay Delta initiative. This decision could significantly hamper ongoing Federal and State efforts to restore this ecosystem, protect the drinking water of 22 million Californians, and enhance water supply and reliability for over 7 million acres of highly productive farmland and growing urban areas across California. The \$60 million budget request, all of which would be used to support activities that can be carried out using existing authorities, is the minimum necessary to ensure adequate Federal participation in these initiatives, which are essential to reducing existing conflicts among water users in California. This funding should be provided without legislative restrictions undermining key environmental statutes or disrupting the balanced approach to meeting the needs of water users and the environment that has been carefully developed through almost 6 years of work with the State of California and interested stakeholders.

The bill also fails to provide sufficient funding necessary to restore endangered salmon in the Pacific Northwest, which would interfere with the Corps of Engineers' ability to comply with the Endangered Species Act, and provides no funds to start the new construction project requested for the Florida Everglades. The bill also fails to fund the Challenge 21 program for environmentally friendly flood damage reduction projects, the program to modernize Corps recreation facilities, and construction of an emergency outlet at Devil's Lake. In addition, it does not fully support efforts to re-

search and develop nonpolluting, domestic sources of energy through solar and renewable technologies that are vital to America's energy security.

Finally, the bill provides nearly \$700 million for over 300 unrequested projects, including: nearly 80 unrequested projects totaling more than \$330 million for the Department of Energy; nearly 240 unrequested projects totaling over \$300 million for the Corps of Engineers; and, more than 10 unrequested projects totaling in excess of \$10 million for the Bureau of Reclamation. For example, more than 80 unrequested Corps of Engineers construction projects included in the bill would have a long-term cost of nearly \$2.7 billion. These unrequested projects and earmarks come at the expense of other initiatives important to taxpaying Americans.

The American people deserve Government spending based upon a balanced approach that maintains fiscal discipline, eliminates the national debt, extends the solvency of Social Security and Medicare, provides for an appropriately sized tax cut, establishes a new voluntary Medicare prescription drug benefit in the context of broader reforms, expands health care coverage to more families, and funds critical investments for our future. I urge the Congress to work expeditiously to develop a bill that addresses the needs of the Nation.

**William J. Clinton**

The White House,  
October 7, 2000.

**Telephone Remarks to a Reception  
for Representative Julia Carson**

*October 7, 2000*

Well, first of all, I want to thank Jeff for hosting this event tonight and for the many years of friendship I've enjoyed with him. I've been told that Evan and Susan Bayh are there and Frank and Judy O'Bannon and your other State officials. I heard you talking about Mayor Peterson. And Joe Andrew—I want to say again what I said this afternoon—he's really done Indiana proud here at the DNC. I'm really proud of him.
